

What is the iEV “Intelligent Electric Vehicle” ?

What is the iEV “Intelligent Electric Vehicle” ?

An Intelligent electric vehicle uses batteries for traction . After use, the batteries can be charged in only six minutes time in ICS “Intelligent charging station” or can be changed in only 2-3 minutes. Also the IEV has an on board charger). This is not usually called a pure electric vehicle.

Prototype: We made and tested the first prototype ARYANA 792 successfully in 2001.
