

AIMS

What is the AIMS “ARYANA INTELLIGENT TRANSPORTATION SYSTEM” ?

The new environmentally-friendly innovation “ARYANA Intelligent Transportation System” (AIMS) consists in a system: An Intelligent Charging Station (ICS) and an Intelligent Electric Vehicle (IEV). The IEV's top speed is 160 km/h with a 300 km range, and the IEFCV's top speed is 160 km/h with a 500 km range. Both are vehicles free of noise and air pollution. It is a new generation of environmentally-friendly vehicles. The key point is that the recharging of the battery and the refueling of the hydrogen tank takes only six minutes.
